

### **IN THE SPECIFICATION**

(1) On page 21, delete the paragraph at lines 25-28 and replace it with:

The linker sequence may consist of, for example, from 26 to 41 amino acids, preferably 29, 30, 31 or 32 amino acids, or 33, 34, 35 or 36 amino acids. Particular linkers have the formula –PGGG-(SGGGG)<sub>5</sub>-P- (SEQ ID NO:181) and –PGGG-(SGGG)<sub>6</sub>-P- (SEQ ID NO:182) wherein P is proline, G is glycine and S is serine.
